Dibris

Ph.D. - Faculty Seminars 2018

Conference room
3rd floor
2:30pm

Università di Genova
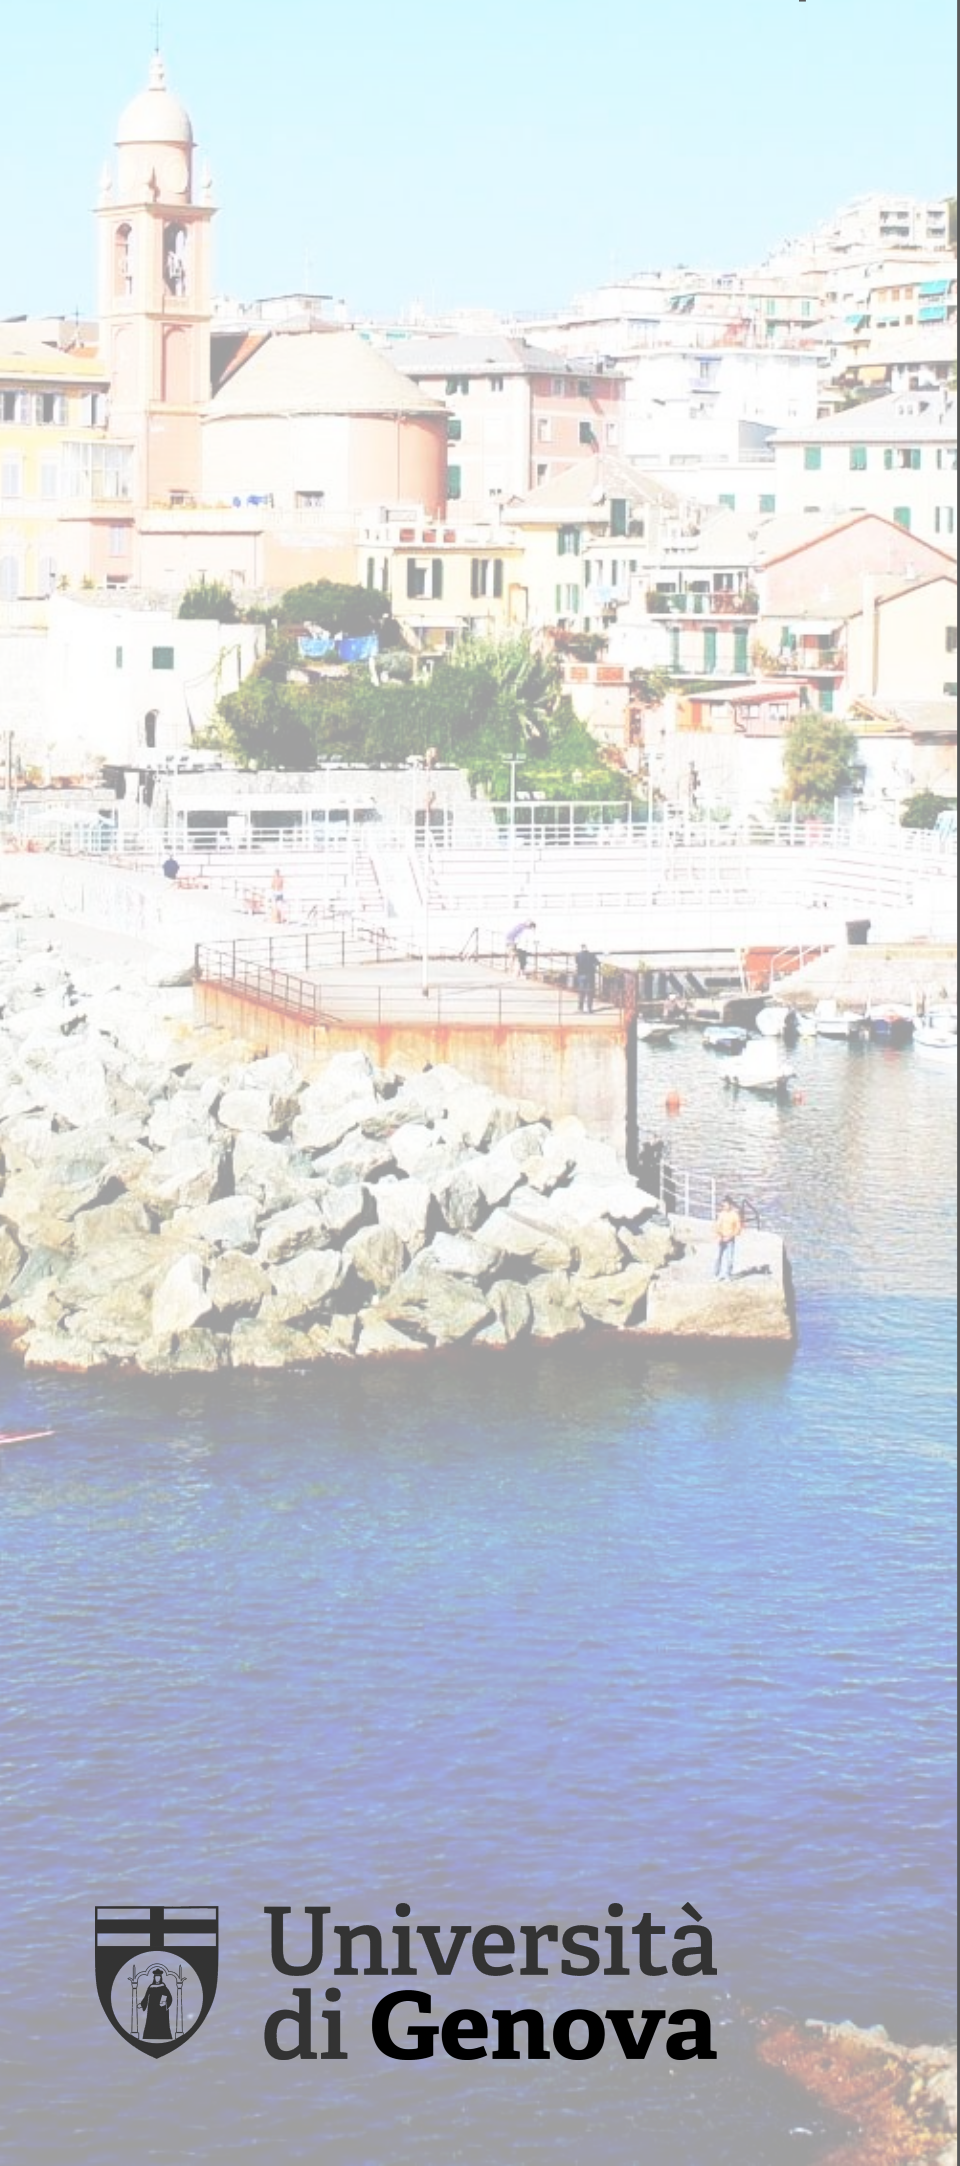

04 Oct.	**Alessio Merlo**	Phishing attacks on modern Android
	Annalisa Barla	Exploiting network analysis to understand neurological time-series
11 Oct.	**Giorgio Ballestin**	The current challenges of augmented reality
10–12 Oct.	*PhD Days*	
18 Oct.	**Gian Maria Marconi**	Structured learning: exploiting geometric information in data
25 Oct.	*Graduations*	
08 Nov.	**Diego Clerissi**	Towards an approach for developing and testing Node-RED IoT systems
15 Nov.	**Federico Tomasi**	Latent variable time-varying network inference
22 Nov.	**Alessandro Verri**	Convolutional coding, the noisy-channel coding theory and machine learning
	Fabio Solari	Visual perception: neural modelling and implications for virtual reality
29 Nov.	**Giorgia Gazzarata**	User Authorization Queries in RBAC Systems: Extensions, Benchmarks and Experiments
7 Dec	**Davide Ancona**	Runtime Verification for Distributed Systems
	Barbara Catania	Keep Calm and Relax: the Role of Relaxation in Large-Scale Data Management

… see you in January!
